JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Adsorption
Electrochemical quartz crystal microbalance study of copper adatoms on gold electrodes. Part II. Further discussion on the specific adsorption of anions from solutions of perchloric and sulfuric acid (Uchida et al.) 5
Amalgam formation
Mechanism of retarded amalgam formation and electron transfer reactions in pure formamide solutions (Anastopoulos) 179
Analytes
Voltammetric method for distinguishing between electrochemical reactions involving solid or dissolved analytes within carbon paste electrodes (Encinas Bachiller et al.) 217
Anodic behaviour
The anodic behaviour of niobium and the structure of its complexes in carbamide + chloride melts (Volkov et al.) 13
Au electrode
Three-probe voltammetric characterisation of octadecanethiol self-assembled monolayer integrity on gold electrodes (Krysiński, Brzostowska-Smolska) 61

Benzophenone
Photoelectrochemical reaction mechanisms. The reduction of benzophenone and 4-halobenzophenones (Leslie et al.) 165
Bilayers
Electrochemical properties of bilayers of conducting polymers: polypyrrole with poly(4-styrenesulfonate) ions/poly(*N*-methylpyrrole). Studies of the permeability of the outer layer towards cations (Wojda, Maksymiuk) 93
Butler–Volmer equation
Application of the network method to simulation of a square scheme with Butler–Volmer charge transfer (García-Hernández et al.) 207

Capacitance–potential curves
Study of non-faradaic 2D phase transitions by use of cyclic voltammetry and capacitance–potential curves (Prieto et al.) 113
Carbamide
The anodic behaviour of niobium and the structure of its complexes in carbamide + chloride melts (Volkov et al.) 13
Carbon paste electrodes
Voltammetric method for distinguishing between electrochemical reactions involving solid or dissolved analytes within carbon paste electrodes (Encinas Bachiller et al.) 217
Catalysis
Homogeneous and heterogeneous catalytic redox processes: solution and solid state voltammetry of lead complexes at carbon electrodes (Marken et al.) 25
Catalytic reduction of nitrate
Electrochemical conversion of nitrate to ammonia in water using Cobalt-DIM as catalyst (Xiang et al.) 1
Catecholamines
Optimization of preparation of poly(3-methylthiophene)-modified Pt microelectrodes for detection of catecholamines (Zhang et al.) 101
Charge transfer
Application of the network method to simulation of a square scheme with Butler–Volmer charge transfer (García-Hernández et al.) 207
Charge trapping
Electrochemical properties of bilayers of conducting polymers: polypyrrole with poly(4-styrenesulfonate) ions/poly(*N*-methylpyrrole). Studies of the permeability of the outer layer towards cations (Wojda, Maksymiuk) 93
Chloride
The anodic behaviour of niobium and the structure of its complexes in carbamide + chloride melts (Volkov et al.) 13
Cobalt complex
Electrochemical conversion of nitrate to ammonia in water using Cobalt-DIM as catalyst (Xiang et al.) 1
Contaminated water
Electrochemical conversion of nitrate to ammonia in water using Cobalt-DIM as catalyst (Xiang et al.) 1
Copper
Electrochemical quartz crystal microbalance study of copper adatoms on gold electrodes. Part II. Further discussion on the specific adsorption of anions from solutions of perchloric and sulfuric acid (Uchida et al.) 5
Coupled chemical–electrochemical reactions
Effects of supporting electrolyte on the mass-transfer limited current for coupled chemical–electrochemical reactions (Hicks, Fedkiw) 75
Crystal orientation
Surface properties of fractured and polished platinum microelectrodes (Caruana, Bannister) 197
Crystal size
Surface properties of fractured and polished platinum microelectrodes (Caruana, Bannister) 197
Cyclic voltammetry
Study of non-faradaic 2D phase transitions by use of cyclic voltammetry and capacitance–potential curves (Prieto et al.) 113
Cyclic voltammetry for the transfer of multiple charged ions at large ITIES: general computational methodology and application to simple and facilitated ion transfer reactions (Reymond et al.) 121

Diols
Homogeneous and heterogeneous catalytic redox processes: solution and solid state voltammetry of lead complexes at carbon electrodes (Marken et al.) 25

Electrocatalysis
Electrochemical conversion of nitrate to ammonia in water using Cobalt-DIM as catalyst (Xiang et al.) 1
Electrocatalyst for non-enzymatic oxidation of glucose in neutral saline solutions (Gorski, Kennedy) 43
Electrochemical impedance spectroscopy
The power of reparametrization of measurement models in electrochemical impedance spectroscopy (Zoltowski) 173
Electrochemical interfaces
SERS studies on electrode|electrolyte interfacial waterI. Ion effects in the negative potential region (Zou et al.) 19
Electrochemical quartz crystal microbalance
Electrochemical quartz crystal microbalance study of copper adatoms on gold electrodes. Part II. Further discussion on the specific adsorp-

tion of anions from solutions of perchloric and sulfuric acid (Uchida et al.) 5

Electrochemical reactions
Voltammetric method for distinguishing between electrochemical reactions involving solid or dissolved analytes within carbon paste electrodes (Encinas Bachiller et al.) 217

Electrochemistry
Electrochemical, in situ spectrocyclic voltammetric and electrochromic studies of phenosafranine in Nafion® film (Abraham John, Ramaraj) 49

Electrochromic studies
Electrochemical, in situ spectrocyclic voltammetric and electrochromic studies of phenosafranine in Nafion® film (Abraham John, Ramaraj) 49

Electrolyte electroreflectance
The scanning microscope for semiconductor characterization: photocurrent, photovoltage and electrolyte electroreflectance imaging at the n-$MoSe_2$|I^- interface (Chaparro et al.) 153

Electron transfer
Mechanism of retarded amalgam formation and electron transfer reactions in pure formamide solutions (Anastopoulos) 179

Electropolymerization
Optimization of preparation of poly(3-methylthiophene)-modified Pt microelectrodes for detection of catecholamines (Zhang et al.) 101

Formamide
Mechanism of retarded amalgam formation and electron transfer reactions in pure formamide solutions (Anastopoulos) 179

Frozen electrode
Ion transfer of tetraalkylammonium cations at an interface between frozen aqueous solution and 1,2-dichloroethane (Rahman, Doe) 159

FTIR spectroscopy
Electrochemical behaviour of oxocarbons on single crystal platinum electrodes. Part IV. Rhodizonic acid in 0.5 M sulphuric acid medium (Carbó et al.) 185

Glucose
Electrocatalyst for non-enzymatic oxidation of glucose in neutral saline solutions (Gorski, Kennedy) 43

Gold electrodes
Electrochemical quartz crystal microbalance study of copper adatoms on gold electrodes. Part II. Further discussion on the specific adsorption of anions from solutions of perchloric and sulfuric acid (Uchida et al.) 5

Halobenzophenones
Photoelectrochemical reaction mechanisms. The reduction of benzophenone and 4-halobenzophenones (Leslie et al.) 165

Hydrogen adsorption
In situ determination of the 'real area factor' in H_2 evolution electrocatalysis at porous Ni–Fe composite electrodes (Šimpraga et al.) 141

Hydroxy acid
Evaluation of the quantum efficiency of the photoanodic reaction on titanium dioxide in aqueous solutions containing hydroxy acid salts by a photothermal method (Maeda et al.) 213

Immittance
The power of reparametrization of measurement models in electrochemical impedance spectroscopy (Zoltowski) 173

Impedance
The power of reparametrization of measurement models in electrochemical impedance spectroscopy (Zoltowski) 173

Interfacial ion transfer
Ion transfer of tetraalkylammonium cations at an interface between frozen aqueous solution and 1,2-dichloroethane (Rahman, Doe) 159

Ion pair
SERS studies on electrode|electrolyte interfacial waterI. Ion effects in the negative potential region (Zou et al.) 19

ITIES
Study of ion transfer across phospholipid monolayers adsorbed at micropipette ITIES (Kontturi et al.) 69
Cyclic voltammetry for the transfer of multiple charged ions at large ITIES: general computational methodology and application to simple and facilitated ion transfer reactions (Reymond et al.) 121
Ion transfer of tetraalkylammonium cations at an interface between frozen aqueous solution and 1,2-dichloroethane (Rahman, Doe) 159

Kolbe oxidative dimerization
Effects of supporting electrolyte on the mass-transfer limited current for coupled chemical–electrochemical reactions (Hicks, Fedkiw) 75

Lead
Homogeneous and heterogeneous catalytic redox processes: solution and solid state voltammetry of lead complexes at carbon electrodes (Marken et al.) 25

Mathematical model
Cyclic voltammetry for the transfer of multiple charged ions at large ITIES: general computational methodology and application to simple and facilitated ion transfer reactions (Reymond et al.) 121

Methoxy groups
Reactivity of oxidized oligothiophenes substituted with methoxy and thioalkyl groups (Tabakovic et al.) 35

Microelectrodes
Optimization of preparation of poly(3-methylthiophene)-modified Pt microelectrodes for detection of catecholamines (Zhang et al.) 101
Surface properties of fractured and polished platinum microelectrodes (Caruana, Bannister) 197

Micropipette
Study of ion transfer across phospholipid monolayers adsorbed at micropipette ITIES (Kontturi et al.) 69

Modelling
The power of reparametrization of measurement models in electrochemical impedance spectroscopy (Zoltowski) 173

n-$MoSe_2$|I^-
The scanning microscope for semiconductor characterization: photocurrent, photovoltage and electrolyte electroreflectance imaging at the n-$MoSe_2$|I^- interface (Chaparro et al.) 153

Nafion® film
Electrochemical, in situ spectrocyclic voltammetric and electrochromic studies of phenosafranine in Nafion® film (Abraham John, Ramaraj) 49

Nernst diffusion-layer model
Effects of supporting electrolyte on the mass-transfer limited current for coupled chemical–electrochemical reactions (Hicks, Fedkiw) 75

Network method
Application of the network method to simulation of a square scheme with Butler–Volmer charge transfer (García-Hernández et al.) 207

Niobium
The anodic behaviour of niobium and the structure of its complexes in carbamide + chloride melts (Volkov et al.) 13

Nitrate
Electrochemical conversion of nitrate to ammonia in water using Cobalt-DIM as catalyst (Xiang et al.) 1

Non-faradaic peaks
Study of non-faradaic 2D phase transitions by use of cyclic voltammetry and capacitance–potential curves (Prieto et al.) 113

Non-linearity
The power of reparametrization of measurement models in electrochemical impedance spectroscopy (Zoltowski) 173

Octadecanethiol
Three-probe voltammetric characterisation of octadecanethiol self-assembled monolayer integrity on gold electrodes (Krysiński, Brzostowska-Smolska) 61

Oligothiophenes
Reactivity of oxidized oligothiophenes substituted with methoxy and thioalkyl groups (Tabakovic et al.) 35
Oxidation
Homogeneous and heterogeneous catalytic redox processes: solution and solid state voltammetry of lead complexes at carbon electrodes (Marken et al.) 25
Reactivity of oxidized oligothiophenes substituted with methoxy and thioalkyl groups (Tabakovic et al.) 35
Electrocatalyst for non-enzymatic oxidation of glucose in neutral saline solutions (Gorski, Kennedy) 43
Oxidation behaviour
Electrochemical behaviour of oxocarbons on single crystal platinum electrodes. Part IV. Rhodizonic acid in 0.5 M sulphuric acid medium (Carbó et al.) 185

Perchloric acid
Electrochemical quartz crystal microbalance study of copper adatoms on gold electrodes. Part II. Further discussion on the specific adsorption of anions from solutions of perchloric and sulfuric acid (Uchida et al.) 5
Phase transitions
Study of non-faradaic 2D phase transitions by use of cyclic voltammetry and capacitance–potential curves (Prieto et al.) 113
Phenosafranine
Electrochemical, in situ spectrocyclic voltammetric and electrochromic studies of phenosafranine in Nafion® film (Abraham John, Ramaraj) 49
Phospholipid
Study of ion transfer across phospholipid monolayers adsorbed at micropipette ITIES (Kontturi et al.) 69
Photoanodic reaction
Evaluation of the quantum efficiency of the photoanodic reaction on titanium dioxide in aqueous solutions containing hydroxy acid salts by a photothermal method (Maeda et al.) 213
Photocurrent
The scanning microscope for semiconductor characterization: photocurrent, photovoltage and electrolyte electroreflectance imaging at the n-$MoSe_2$|I^- interface (Chaparro et al.) 153
Photoelectrochemistry
Photoelectrochemical reaction mechanisms. The reduction of benzophenone and 4-halobenzophenones (Leslie et al.) 165
Photothermal method
Evaluation of the quantum efficiency of the photoanodic reaction on titanium dioxide in aqueous solutions containing hydroxy acid salts by a photothermal method (Maeda et al.) 213
Photovoltage
The scanning microscope for semiconductor characterization: photocurrent, photovoltage and electrolyte electroreflectance imaging at the n-$MoSe_2$|I^- interface (Chaparro et al.) 153
Platinum
Surface properties of fractured and polished platinum microelectrodes (Caruana, Bannister) 197
Platinum(*hkl*) surfaces
Electrochemical behaviour of oxocarbons on single crystal platinum electrodes. Part IV. Rhodizonic acid in 0.5 M sulphuric acid medium (Carbó et al.) 185
Poly(3-methylthiophene)
Optimization of preparation of poly(3-methylthiophene)-modified Pt microelectrodes for detection of catecholamines (Zhang et al.) 101
Poly(*N*-methylpyrrole)
Electrochemical properties of bilayers of conducting polymers: polypyrrole with poly(4-styrenesulfonate) ions/poly(*N*-methylpyrrole). Studies of the permeability of the outer layer towards cations (Wojda, Maksymiuk) 93
Polypyrrole
Electrochemical properties of bilayers of conducting polymers: polypyrrole with poly(4-styrenesulfonate) ions/poly(*N*-methylpyrrole). Studies of the permeability of the outer layer towards cations (Wojda, Maksymiuk) 93
Porous Ni–Fe
In situ determination of the 'real area factor' in H_2 evolution electrocatalysis at porous Ni–Fe composite electrodes (Šimpraga et al.) 141
Proton reduction
Effects of supporting electrolyte on the mass-transfer limited current for coupled chemical–electrochemical reactions (Hicks, Fedkiw) 75

Quantum efficiency
Evaluation of the quantum efficiency of the photoanodic reaction on titanium dioxide in aqueous solutions containing hydroxy acid salts by a photothermal method (Maeda et al.) 213

Reactivity
Reactivity of oxidized oligothiophenes substituted with methoxy and thioalkyl groups (Tabakovic et al.) 35
Real area factor
In situ determination of the 'real area factor' in H_2 evolution electrocatalysis at porous Ni–Fe composite electrodes (Šimpraga et al.) 141
Reduction mechanism
Photoelectrochemical reaction mechanisms. The reduction of benzophenone and 4-halobenzophenones (Leslie et al.) 165
Reparametrization
The power of reparametrization of measurement models in electrochemical impedance spectroscopy (Zoltowski) 173
Retardation
Mechanism of retarded amalgam formation and electron transfer reactions in pure formamide solutions (Anastopoulos) 179
Rhodizonic acid
Electrochemical behaviour of oxocarbons on single crystal platinum electrodes. Part IV. Rhodizonic acid in 0.5 M sulphuric acid medium (Carbó et al.) 185

Saline solution
Electrocatalyst for non-enzymatic oxidation of glucose in neutral saline solutions (Gorski, Kennedy) 43
Scanning microscope
The scanning microscope for semiconductor characterization: photocurrent, photovoltage and electrolyte electroreflectance imaging at the n-$MoSe_2$|I^- interface (Chaparro et al.) 153
Self-assembled monolayers
Three-probe voltammetric characterisation of octadecanethiol self-assembled monolayer integrity on gold electrodes (Krysiński, Brzostowska-Smolska) 61
Semiconductors
The scanning microscope for semiconductor characterization: photocurrent, photovoltage and electrolyte electroreflectance imaging at the n-$MoSe_2$|I^- interface (Chaparro et al.) 153
Short potential step
Study of ion transfer across phospholipid monolayers adsorbed at micropipette ITIES (Kontturi et al.) 69
Silver electrodes
SERS studies on electrode|electrolyte interfacial waterI. Ion effects in the negative potential region (Zou et al.) 19
Simulation
Application of the network method to simulation of a square scheme with Butler–Volmer charge transfer (García-Hernández et al.) 207
Simulation of ion transfer
Cyclic voltammetry for the transfer of multiple charged ions at large ITIES: general computational methodology and application to simple and facilitated ion transfer reactions (Reymond et al.) 121
Spectrocyclic voltammetry
Electrochemical, in situ spectrocyclic voltammetric and electrochromic studies of phenosafranine in Nafion® film (Abraham John, Ramaraj) 49

Square scheme
Application of the network method to simulation of a square scheme with Butler–Volmer charge transfer (García-Hernández et al.) 207
Substitution
Reactivity of oxidized oligothiophenes substituted with methoxy and thioalkyl groups (Tabakovic et al.) 35
Sulphuric acid
Electrochemical quartz crystal microbalance study of copper adatoms on gold electrodes. Part II. Further discussion on the specific adsorption of anions from solutions of perchloric and sulfuric acid (Uchida et al.) 5
Electrochemical behaviour of oxocarbons on single crystal platinum electrodes. Part IV. Rhodizonic acid in 0.5 M sulphuric acid medium (Carbó et al.) 185
Supporting electrolyte effects
Effects of supporting electrolyte on the mass-transfer limited current for coupled chemical–electrochemical reactions (Hicks, Fedkiw) 75
Surface enhanced Raman spectroscopy
SERS studies on electrode|electrolyte interfacial waterI. Ion effects in the negative potential region (Zou et al.) 19
Surface properties
Surface properties of fractured and polished platinum microelectrodes (Caruana, Bannister) 197
Tetraalkylammonium cations
Ion transfer of tetraalkylammonium cations at an interface between frozen aqueous solution and 1,2-dichloroethane (Rahman, Doe) 159
Thioalkyl groups
Reactivity of oxidized oligothiophenes substituted with methoxy and thioalkyl groups (Tabakovic et al.) 35
Titanium dioxide
Evaluation of the quantum efficiency of the photoanodic reaction on titanium dioxide in aqueous solutions containing hydroxy acid salts by a photothermal method (Maeda et al.) 213

Voltammetry
Three-probe voltammetric characterisation of octadecanethiol self-assembled monolayer integrity on gold electrodes (Krysiński, Brzostowska-Smolska) 61
Voltammetric method for distinguishing between electrochemical reactions involving solid or dissolved analytes within carbon paste electrodes (Encinas Bachiller et al.) 217

Water molecules
SERS studies on electrode|electrolyte interfacial waterI. Ion effects in the negative potential region (Zou et al.) 19
